

**ORDER FORM
FOR
SOFTWARE PRODUCTS AND MAINTENANCE SERVICES
(MOODY'S ESG)**

Client Name	The Channel Managing Agency Limited	Moody's Rep	Arturo Rodriguez
Master Agreement	Master License and Services Agreement dated December 23, 2016 (Moody's Agreement No. 00073840.0)		
Order Form Effective Date	December 23, 2016		
Pursuant to the Master Agreement with Moody's (or an affiliate of Moody's) identified above and any additional terms set forth in this Order Form, the undersigned Client hereby agrees to license, and Moody's agrees to furnish, the following Products. Capitalized terms not otherwise defined in this Order Form shall have the meanings given to such terms in the Master Agreement or the Addenda and Exhibits attached thereto. By signing this Order Form, the parties below agree to incorporate by reference the terms of the Master Agreement herein and to be bound thereby.			
PRODUCTS			
Software Programs Licensed as at the Order Form Effective Date	Initial Term	License Parameter	Total Annual License Fee at Order Form Effective Date (£)
The Moody's Base Insurance ESG Product - Input / output modules, Monte-Carlo code framework, random number generators, stochastic generators - Basic equity models (Constant Volatility and TVTD) 2-Factor Vasicek & 2FBK Interest rate models including Time Varying Term Premium - Includes ability to add multiple curves - Inflation / real term structure model - Includes InflationPlus & Inflation Wedges - Generic bond portfolios (Government) - Composite portfolios - Standard Support Package - Non-market risk drivers (calibrations charged separately) Quarterly Calibration Update - Standard Calibrations: Best Views - USD, GBP, EUR, CAD, AUS, JPY economies - Wage Inflation Calibration (USD & GBP only) - GDP Calibration (USD & GBP only) Additional Models Multi-Economy Modelling - Includes ability to simultaneously model multiple economies - FX modelling Municipal Bonds (US Bonds Calibration only) Calibration Tools Base Calibration Toolset: This includes the following tools: - Ext2FBK Swaption Tool - Ext2FBK Gamma Tool - Vasicek Real Rate Tools - Equity Constant Vol Tool - Equity TVDV Tool - Child Equity Tool Additional Calibration Tools - Credit Model Initialisation Tool (inc. Lite tool)	Three (3) years from the Order Form Effective Date, annually thereafter.	Detailed below.	GBP 40,000.00 (plus applicable taxes)

mm

License Parameter Definitions as used in this Order Form	
Term	Meaning
Permitted Use	Use of the Products by Permitted Users to create Scenario Sets required by the Client and Beneficiaries to assist with calculating the Client's and Beneficiaries' market consistent valuation, long term economic capital and short term economic capital of the Client's and Beneficiaries' insurance business and for the design and pricing of the Client's and Beneficiaries' new insurance products. The Permitted Use shall expressly exclude the use of the Products or anything derived from them for: (i) the creation of any form of marketing material; or (ii) providing any form of retail financial planning or investment advice.
Beneficiaries	As at the Order Form Effective Date there are no Beneficiaries.
Permitted Users	Permanent or temporary members of staff of the Client, Beneficiaries and Approved Third Parties. Permitted Users shall specifically exclude anyone who is involved in distributing or developing for commercial gain stochastic economic scenarios or developing a stochastic economic scenario generator.
Approved Third Parties	An employee of any entity approved by Moody's in writing subject always to the Third Party Use Conditions. As at the Order Form Effective Date there are no Approved Third Parties.
Third Party Use Conditions	Approved Third Parties access and use of the Products is only for the benefit of Client and the Beneficiaries in full compliance with the provisions of this Order Form and the Master Agreement and such entity has: (i) agreed in writing with the Client to comply with the terms of this Order Form and the Master Agreement; and (ii) provided a written undertaking to the Client that neither access to nor use of the Products will be granted to anyone within the entity who is involved in distributing or developing for commercial gain stochastic economic scenarios or developing a stochastic economic scenario generator. A breach of the terms of this Order Form or the Master Agreement by an Approved Third Party shall be a deemed breach of this Order Form by the Client for which Client shall be responsible and liable.
Licensed Site	The Client's offices at 10 Lime Street, London, EC3M 7AA and such other locations approved in writing by Moody's as a Licensed Site.
Production Environment	An environment used by end users to process live data in the day-to-day business operations of the Client and the Beneficiaries.
Scenario Sets	Outputs created from the Permitted Users' use of the Software Program and/or generated and supplied by Moody's to the Client.
Permitted Recipients	Permitted Users and permanent or temporary members of staff of any Client Group Company. Auditors, governmental regulators, or self-regulatory organization regulators to the extent they require access to the Scenario Sets in connection with performances of their auditing and regulatory functions of the Client.
Restricting Acquisitions	The Annual License Fees herein are predicated upon Moody's current understanding of the Clients size, scope of use, and authorised Beneficiaries. Moody's reserves the right to revise the License Parameter and Annual License Fees in the event of a material acquisition by/of the Client. Organic growth (through other than acquisition) shall not trigger the foregoing Moody's right.

mm

Additional Terms and Conditions:

1. **Scope of Use.** The Products and Scenario Sets may only be used by Permitted Users for the Permitted Use. The license to the Software Program shall be an object code license only. The Software Program may only be installed at the Licensed Site. For the avoidance of doubt, Moody's acknowledges and agrees that the Permitted Users may access the Software Program remotely. The Client and Beneficiaries may only provide access to Scenario Sets to Permitted Recipients.

2. **Calibration Services.** Moody's will provide the Client with Moody's standard ESG calibration Services consisting of:

- Standard quarterly calibrations only for the specific economies and models licensed by the Client. These are provided in the form of PDF documents, '.bhc' calibration update files or '.bhm' model update files; and
- Ad-hoc calibration notes.

The provision of calibrations is subject to Moody's being able to obtain, in sufficient quantity and quality, the market data required to produce such calibrations. Fees for Calibration Services are included in the Total Annual License Fee.

3. **Software Program Delivery.** The Software Program shall be deemed delivered once it has been made available for download from Moody's or Moody's B&H FTP site.

4. **Software Program Maintenance Services.** The Annual Subscription License Fee includes the Maintenance Services set forth on Moody's standard Maintenance Program Terms attached hereto (Appendix B) for all Software Programs listed above, which shall be deemed "Covered Programs" under the Maintenance Program Terms. Maintenance Services shall not include any support relating to bespoke model functionality, non-standard calibrations, or assistance with development of bespoke model functionality or non-standard calibrations.

5. **Definition of Documentation.** For purposes of this Order Form, the definition of "Documentation" in Section 1 of the Master Agreement shall be deleted and replaced with the following:

"Documentation" means the following: (i) for Software Programs, "Documentation" shall mean the latest version of the User Guide for each module of the Software licensed, and (iii) for all other Products that are not Software Programs, "Documentation" shall mean the help screens accessed within the Products and any printed or electronic user manuals provided to Client in connection with the Products. Documentation does not include training or course materials licensed or sold separately or documentation delivered by Moody's professional services team in the course of an implementation project of other professional services provided under a separate agreement.

6. **Training and User Conferences**

- 6.1 Moody's host user conferences which are exclusive to its clients. User conferences are designed to cover in significant detail ESG and calibrations training. The materials available during user conference (training sessions) include the presentation slides in electronic form and in physical hard-copy form, as well as the example simulation and calibration files with accompanying documentation. Training materials for the ESG component of the Solution are available on the Moody's B&H Knowledge Base in the form of webinars and tutorials.

- The Client will have three (3) complimentary passes annually to Moody's user conferences.

- 6.2 Subsequent to this Order Form Effective Date the Client will have up to a two half days (8 hours in total) of training at no extra charge at the Client's offices or other location as agreed. The training will be completed within the first year of the Initial Term of this Order Form. The training agenda is to be agreed between the Parties prior to the Training.

In the event the training is conducted at the Client site, Client shall reimburse Moody's for its travel and related out of pocket expenses.

7. **Fee Increases.** Notwithstanding Section 3.1 of the Master Agreement, during the Initial Term of this Order Form any annual increase in the Total Annual License Fee shall not exceed 5%.

8. **Customized Data Deliverables**

As outlined in Appendix A, the Scenario Set Specification dated End December 2016 shall be provided to the Client on a one-time complimentary basis by January 27, 2017

- Standard ESG calibrations notes will be provided with the Scenario Sets (relating to the relevant economies for the Scenario Sets.)

APPENDIX B
MAINTENANCE PROGRAM TERMS

These Maintenance Program Terms apply to the provision of software support and maintenance services to you ("Client") by Moody's Analytics, Inc. or the relevant Moody's affiliate from whom Client orders such services (as applicable, "Moody's"). Ordering the support and maintenance services for the relevant covered Moody's software program indicates Client's acceptance of the terms and conditions contained in these Maintenance Program Terms.

Covered Program(s): Moody's ESG

1. Scope of Maintenance Services. Moody's will provide Client the software maintenance and support services ("Maintenance Services") listed below for the Current Release of a Covered Program only during the active term of a subscription or maintenance contract, and provided that the applicable license, subscription and other fees are paid in full.
2. Definitions.
 - 2.1 "Current Release" means the then-current unmodified Major Version release of a Covered Program made generally available by Moody's to similarly situated customers, including any Minor Versions and Patches thereto made generally available by Moody's and all parameterization of the Covered Program done in accordance with the standard features of the Covered Program that are described in the Documentation.
 - 2.2 "Documentation" means the latest versions of the Covered Program documents that are titled "User Guide" and can be accessed by Client at Moody's Analytics Client Support Web (<http://support.moodyanalytics.com>) in the Content section. Documentation does not include training or course materials licensed or sold separately or documentation delivered by Moody's professional services team in the course of an implementation project or other professional services provided under a separate agreement. The foregoing definition of "Documentation" shall apply for purposes of these Maintenance Program Terms, notwithstanding any provisions to the contrary in any other agreements between Client and Moody's.
 - 2.3 "Error" means any failure in a Covered Program to substantially comply with its Documentation. Errors shall be further classified as follows:
 - 2.3.1 "Severity 1 Error" means an Error that causes a Covered Program to be wholly inoperative, or so severely impaired that that Client is unable to use the Covered Program to perform any of its intended functions in accordance with the Documentation.
 - 2.3.2 "Severity 2 Error" means an Error that causes a Covered Program to fail to function in material accordance with its Documentation so that one or more material functions are severely impaired but the Covered Program is still operational with respect to other functions.
 - 2.3.3 "Severity 3 Error" means an Error reported by Client that causes inconvenience, but does not materially and adversely affect the functionality of the Covered Program.
 - 2.4 "Major Version" means a release version of the Covered Program in which new functionalities or other substantial changes are introduced, and which is typically denoted by a change in whole number to the left of the first decimal point (e.g., version 2.0 to 3.0).
 - 2.5 "Minor Version" means a release version of the Covered Program containing minor functional enhancements and corrections of previously reported Errors, and which is typically denoted by a change in the number to the right of the first decimal point (e.g., version 2.1 to 2.2).
 - 2.6 "Patch" means a release version of the Covered Program in which detected Errors are being remedied, and which is typically denoted by a change in the number to the right of the second decimal point (e.g., version 2.1.1 to 2.1.2).
 - 2.7 "Updates" shall mean Major Versions, Minor Versions, Patches or any other updated, upgraded, or revised versions of a Covered Program that Moody's, at its sole discretion, makes available to Moody's customers who have contracted for Maintenance Services. Updates shall not include any new releases which contain substantially new or different functionality to a Covered Program, which Moody's licenses as separate products or modules, or which Moody's creates at the request of a specific customer.
 - 2.8 "Upgrade" shall mean Client's updating of a previously installed version of a Covered Program with a more recent Major Version, Minor Version, or Patch.
3. Provision of Updates. Moody's shall provide Updates to the standard version of a Covered Program at no additional cost to the Client. In addition, provided only in such cases where the Covered Program is intended to address compliance with mandatory provisions of a legal regulation as shall be specifically stated in the relevant order form for the Maintenance Services, Moody's shall use reasonable commercial efforts to furnish an Update to such Covered Program (a "Regulatory Update") that modifies the existing functions, or if necessary adds additional functions, in order to take into account any amendments made to the legal regulation in the form published and/or edited by the relevant national regulator. Moody's will use commercially reasonable efforts to furnish such Regulatory Update no later than six (6) months after the appropriate final and official regulatory texts have been made publicly available. Notwithstanding the foregoing, Moody's shall have no obligation to deliver a Regulatory Update to provide enhancements that are not mandated by applicable regulations or in the event of a significant regulatory change which in Moody's judgment would exceed the scope of the basic Maintenance Services, including but not limited to: (i) a fundamental reform of the applicable national financial market; (ii) the publication of a new regulation that is significantly different from or is intended to replace the prior regulation which the Covered Program is intended to address – for example, the 1991 Basel I regulation's replacement in 2006 by Basel II; (iii) the subsequent replacement of Basel II in 2010 by the Basel III framework; or (iv) any other legislative, regulatory or other event of similar scope or magnitude.

um

4. Error Correction. Moody's will use reasonable efforts to correct any Error in a Covered Program, provided such Errors are identified by Client in writing, are replicable by Moody's within an approved computing environment, and confirmed by Moody's to arise directly from the unmodified Covered Program. In particular, Moody's will use reasonable efforts to proceed as described below:

4.1 In the case of a Severity 1 Error, Moody's will: (a) within one (1) business day after receiving notice of a Severity 1 Error from Client, assign at least one qualified technician to dedicate full time within Moody's normal business hours to provide a correction or procedural workaround sufficient to reduce or eliminate the effect of the Severity 1 Error; and (b) within five (5) business days after receiving notice of a Severity 1 Error from Client, provide an error correction or procedural workaround sufficient to alleviate any material adverse effect of the Severity 1 Error on the operation of the Covered Program.

4.2 In the case of a Severity 2 Error, Moody's will, within ten (10) business days after receiving notice of a Severity 2 Error from Client, provide an error correction or procedural workaround sufficient to alleviate any material adverse effect of the Severity 2 Error on the operation of the Covered Program.

4.3 In the case of a Severity 3 Error, Moody's will endeavor to include a correction of such Severity 3 Error by the next Major Version of the Covered Program.

5. Support. Moody's will provide Client with support by telephone or e-mail during the support hours posted at Moody's Analytics Client Support Web applicable to the Covered Program. Such support is limited to the use of reasonable commercial efforts to answer questions from Client regarding the general utilization of the Current Release, but does not include support relating to any changes or customizations made to the Current Release, or assistance with design, development and debugging of code or implementations, including but not limited to creation or deployment of customizations (for example, XML code, groovy script, database objects or PL/SQL code) or developments using development or authoring tools licensed by Moody's (for example, MART, LGD authoring tool, data window design tools and Internal Rating Model Author). In connection with any request by Client for support, Client shall provide Moody's with all information and access to Client's computers that is reasonably necessary to respond to the request.

Client will be able to view the status of each of its support requests relating to Covered Programs that have been logged with Moody's client services at Moody's Analytics Client Support Web. Client will also be able to log new cases and input additional information on existing cases on Moody's Analytics Client Support Web. The official Covered Program user guides can also be accessed at Moody's Analytics Client Support Web.

6. Additional Terms.

6.1 Moody's client services will generally provide remote support for Minor Version or Patch Upgrades via phone and email. However, complex Upgrades (for example, when there are customizations involved) may require on-site assistance or a dedicated remote resource from Moody's. Any such on-site or dedicated assistance will be subject to the parties executing a separate professional services agreement setting forth the scope of such additional services and the fees payable by Client therefor.

6.2 Notwithstanding anything herein to the contrary, the Maintenance Services provided hereunder do not cover the following services: (i) installation, assistance in making changes to the configuration and/or parameterization of the Covered Programs (other than general Upgrade support for Minor Versions or Patches as described in Section 6.1); (ii) services needed to deploy a Major Version (e.g., installation, configuration or Upgrade support); (iii) assistance the Client may require, in exceptional cases, outside Moody's standard support hours; (iv) training of users, administrators, IT staff or other product-related training; (v) services relating to an unsupported version of a Covered Program, or for customized software code; (vi) services provided by Moody's that are necessary to rectify faults (whether or not they impede usage of the software) to the extent to which those faults are attributable to Client's own actions, errors, negligence or failure to comply with reasonable instructions and/or use of the Covered Program under conditions for which the software was not intended and which do not comply with the applicable license agreement and/or use of interfaces, web services, database tables or internal functions other than those that are explicitly recommended in the Documentation for use for data integration and/or functional control of the Covered Program; and (vii) any other similar services which are typically the subject of a separate professional services agreement. The foregoing list is illustrative only, and is non-exhaustive.

6.3 Client shall designate in writing to Moody's up to three (3) appropriate and knowledgeable persons to serve as Client's liaisons with Moody's and through whom all contacts and questions under these Maintenance Program Terms shall be presented to Moody's. Client's liaison persons may be changed by Client by providing written notice to Moody's.

6.4 In the event that Client or any third party makes any unauthorized modifications, enhancements or improvements to a Covered Program, Moody's shall be relieved of its obligations to provide services under these Maintenance Program Terms for any portion of the Covered Programs which have been affected, directly or indirectly, by such changes, modifications, enhancements or improvements.

6.5 Client acknowledges that Moody's has the right to discontinue the development and commercial distribution of any of the Covered Programs and the Maintenance Services for any Covered Program, including without limitation the distribution of older versions of a Covered Program, at any time in its sole discretion, provided that Moody's agrees not to discontinue the Maintenance Services during the active term of Client's order for Maintenance Services or applicable product subscription.

6.6 Notwithstanding the provisions of Section 6.5, Moody's agrees that it will continue to offer Maintenance Services for a Major Version of a Covered Program (including all Minor Versions and Patches associated therewith) until the later of: (i) the date that is 24 months following its initial public release; and (ii) the date that is 12 months following the date upon which Moody's provides notification on Moody's Analytics Client Support Web that it intends to discontinue Maintenance Services for such Major Version.

6.7 From time to time upon Client's request, Moody's may provide additional services outside the scope of the Maintenance Services to provide support or correct difficulties or defects caused by Client's errors, hardware system changes, interactions with other software of Client, assistance with

mm

design, development and debugging of code or any authorized changes or customizing made to the Covered Programs. The scope and costs of such additional services will be separately agreed upon by the parties in writing.

6.8 Unless otherwise provided in the applicable order, the Maintenance Services extend only to licensed production environment(s) of the Covered Program. Maintenance Services for additional licensed environments may be available from Moody's for an additional fee.

6.9 Moody's reserves the right to require Client to install the latest Major Version or Minor Version of a Covered Program in order to benefit from a particular Error correction, Update or Regulatory Update. During the investigation of an incident, Moody's may recommend that Client install the latest Minor Version or Patch associated with a Major Version of a Covered Program. Should Client decide not to follow this advice, Client is informed that the supply by Moody's of the Maintenance Services may be affected.

6.10 In the event that Client's system does not meet the minimum recommended third party hardware and software requirements set forth in the official Covered Program user guides that are available at Moody's client support website, Moody's shall be relieved of its obligations to provide services under these Maintenance Program Terms for any portion of the Covered Programs which have been affected, directly or indirectly, by such failure to comply with the stated requirements.

6.11 Notwithstanding the provisions of Section 4, to the extent that an Error is associated with or caused by technology provided by a licensor of Moody's, the timeline for delivery of a correction or procedural workaround to address the Error will be dependent on such licensor's ability to provide the correction or procedural workaround.

7. Term; Amendments. These Maintenance Program Terms will be in effect during the period which Client has contracted to receive the Maintenance Services as set forth on a separate order and/or agreement between Moody's and Client, and shall renew in accordance with such separate order or agreement. Moody's reserves the right to amend the terms and conditions of the Maintenance Services under these Maintenance Program Terms from time to time by providing written notice to Client. Any such amendments will become effective with respect to Client upon the next renewal term for the Maintenance Services, and Client's election to renew Maintenance Services shall constitute acceptance of the amended terms.

8. Warranty and Disclaimer. Moody's will use commercially reasonable efforts to provide the Maintenance Services, but Moody's cannot guarantee that every question or problem raised by Client can or will be resolved. Nothing in these Maintenance Program Terms shall be construed as expanding or adding to the warranty for a Covered Program as may be set forth in the license agreement for such program or any other agreement with Moody's governing use of the program. EXCEPT AS MAY NOT BE EXCLUDED OR LIMITED BY APPLICABLE LAW, MOODY'S MAKES, AND CLIENT RECEIVES, NO WARRANTIES OR CONDITIONS OF ANY KIND, EXPRESS, IMPLIED, OR STATUTORY, RELATED TO OR ARISING IN ANY WAY OUT OF THESE MAINTENANCE PROGRAM TERMS OR THE PROVISION OF MATERIALS OR SERVICES UNDER THESE MAINTENANCE PROGRAM TERMS. MOODY'S SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

LM
